

RAKESH KUMAR

Software Engineer | Full-Stack Developer (MERN)

Gurugram, India | +91-9306573459 | rakeshchauhan6651@gmail.com

LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate specializing in full-stack development with the MERN stack. Built and shipped multiple full-stack applications featuring JWT authentication, RESTful APIs, and role-based access control, with projects deployed live for real-world use. Strong fundamentals in DSA, backed by active practice on LeetCode. Seeking a Software Engineer role to build clean, scalable, and maintainable software.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering

Graduated: May 2026

Parul University, Vadodara

Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, Web Technologies

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++, SQL

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, bcrypt

Database: MongoDB, Mongoose (Schema Design & Validation), MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, npm

Core CS: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

PROJECTS

Task Management System (TaskFlow) — Node.js, Express.js, MongoDB, JWT, React 2025

- Built a full-stack task management platform for creating, assigning, and tracking tasks across user roles
- Implemented JWT authentication with RBAC — admins assign tasks, users manage only their own
- Developed a dashboard with real-time task statistics and priority-based breakdown visualizations
- Deployed the application on Vercel with a live production build

GitHub: github.com/rakeshkumar0804/taskflow | Live Demo: taskflow-gules-rho.vercel.app

Employee Leave Management System — Node.js, Express.js, MongoDB, JWT, HTML/CSS/JS 2024

- Built a leave management platform with three role-based dashboards: employee, manager, and admin
- Automated the full approval pipeline with real-time status updates, eliminating manual leave tracking
- Built RESTful APIs connecting a responsive frontend to MongoDB with validation and error handling

GitHub: github.com/rakeshkumar0804/leaveflow-hr | Live Demo: leaveflow-hr-hvfh.onrender.com

Developer Portfolio Health Checker — MERN Stack, GitHub API 2026

- Built a platform that analyzes a developer's GitHub profile and portfolio site across scored dimensions — activity, code quality, and hiring-readiness
- Developed AI-powered feedback and recruiter-simulation features to help developers identify and close skill gaps

CERTIFICATIONS

- SQL (Advanced) – HackerRank
- C++ Programming – OpenEDG / Cisco Networking Academy

- Cybersecurity Fundamentals – Udemy
 - Python Programming – Udemy
 - CSS, Bootstrap, JavaScript & PHP Full-Stack Crash Course – Udemy
-

ACHIEVEMENTS

- AMENTIS Innovation Hackathon – GTBIT, New Delhi (2025)
 - CodeKshetra – GD Goenka University, Gurugram (2024)
 - Active on LeetCode — solving DSA problems consistently to strengthen problem-solving skills
-

LANGUAGES

English (Professional Proficiency) | Hindi (Native)
