PROFESSIONAL SUMMARY

Full-Stack Web Developer specializing in React, Node.js, Express, and MongoDB. Experienced in building JWT-authenticated RESTful services and role-based access control systems, with multiple full-stack web applications deployed and live. Strong DSA foundation with 165+ problems solved on LeetCode.

EXPERIENCE

Software Development Intern – Codetech IT Solutions

Jan 2026 – Apr 2026

- Engineered an Internal Employee Management System (Node.js, Express.js, MongoDB) supporting 3 user roles, replacing manual spreadsheet tracking.
- Implemented JWT-based authentication with RBAC across 3 permission tiers (employee, manager, admin), securing role-restricted API access.
- Designed validated RESTful API endpoints enabling full CRUD operations across employee, department, and role modules.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Component Architecture), React Router, Axios, HTML5, CSS3, Bootstrap, Responsive UI

Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC, bcrypt

Database: MongoDB, Mongoose (Schema Design & Validation), MySQL

Languages: JavaScript (ES6+), Python, C++, SQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, npm

Core CS: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

PROJECTS

Task Management System (TaskFlow)

2025

React, Node.js, Express.js, MongoDB, JWT

- Architected a full-stack task platform with component-based React architecture, using Hooks for state management, React Router for navigation, and Axios for API calls.
- Implemented JWT-based authentication with RBAC, enabling admins to assign tasks across the team while restricting standard users to their own view.
- Built a real-time analytics dashboard displaying 4 live task-status metrics (total, in progress, completed, to-do) and a 4-tier priority breakdown (critical, high, medium, low).
- Deployed a fully responsive production build on Vercel.

Live Demo | GitHub

Employee Leave Management System (LeaveFlow)

2024

Node.js, Express.js, MongoDB, JWT, HTML/CSS/JS

- Developed a leave platform with three role-based dashboards (employee, manager, admin), each with scoped permissions via JWT/RBAC.
- Automated the leave approval pipeline with real-time status updates across 3 user tiers, eliminating manual tracking.
- Designed RESTful APIs and validated MongoDB schemas with structured request validation and error handling; deployed on Render.

Live Demo | GitHub

Developer Portfolio Health Checker

2026

MERN Stack, GitHub API

- Architected a MERN-stack platform integrating the GitHub API to analyze developer repositories and portfolio sites, computing hiring-readiness scores across activity, code quality, and profile-completeness dimensions.
- Designed the scoring dashboard and REST API layer, and built an AI-powered feedback engine with recruiter-simulation logic to help developers identify and close skill gaps.

EDUCATION

Parul University – Vadodara, Gujarat, India

2022 – 2026

B.Tech in Computer Science Engineering

CERTIFICATIONS & ACHIEVEMENTS

SQL (Advanced) – HackerRank | C++ Programming – OpenEDG/Cisco | Cybersecurity Fundamentals – Udemy | Python Programming – Udemy | Full-Stack Web Crash Course (CSS, Bootstrap, JS, PHP) – Udemy

LeetCode: Solved 165+ DSA problems over 100+ active days
